Connecting Communities

Thuraya's rural telephony solutions provide a vital stimulus for economic growth and development in rural and remote areas within Thuraya's network.

Thuraya PCO-2110 is a powerful, versatile and cost-effective telecommunication tool offering seamless basic and advanced communication services that allow isolated communities to reach out to the world from remote regions.

Access beyond, go satellite

Valuable Communication

Through the use of satellite technology, Thuraya PCO-2110 provides a valuable channel of connectivity for people who cannot afford to buy satellite phones, but require telecommunications services.

Thuraya PCO-2110 offers voice, fax, data and SMS services in a user friendly public telephone service station where you can walk in to make domestic and international telephone calls, send and receive SMS messages and even browse the internet. The charges for these services are according to the Thuraya PCO-2110 specified rates.

Thuraya PCO-2110 is designed with multiple language interface options to address the local business and communication needs of people across Thuraya's extensive coverage area that spans more than 140 countries in Europe, the Middle East, Asia, Australia and Africa.

Technology

Based on the latest microprocessor technology, Thuraya PCO-2110 is an intelligent public calling office (device) that is designed to meter your outgoing calls and produce a printout with call details and charges.

You can view the complete data on a graphic LCD area of the Thuraya PCO-2110 while the line status is displayed on the corresponding display.

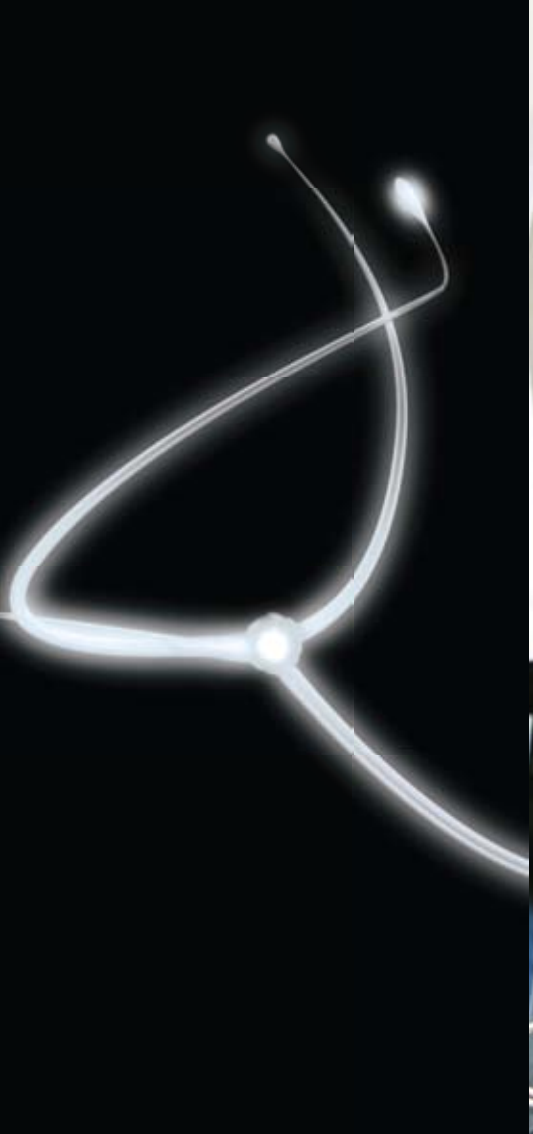
User Friendly Set-up

Thuraya PCO-2110 is user friendly in design, function and operation to ensure maximum comfort levels when you're using the PCO services.

Get instant access to complete call details starting from the initiation of the call. While the telephone is in use, the calendar information (date and time) is displayed on the LCD display as well as on the corresponding display. In addition to the calendar, the LCD also displays the dynamic signal strength, the Global Positioning System (GPS) signal and SMS status of unread messages.

When the phone is not in use, the corresponding display reveals a "dial the number" message. The dialled number can be viewed on the console display when you're on a call. In addition, you can view call charges and call duration that are displayed on the console display and corresponding display. The details of the call are printed as the 'Call Bill' once you have terminated your call.

The PCO also facilitates all printouts that can be taken on a thermal printer.



Features and Benefits

Benefits

- Affordable call charges
- Displays call duration and charges
- Immediate billing upon completion of call sessions
- Make calls in a private and comfortable setting
- Make calls on credit

Applications

- Rural and on-road phone stations
- Natural disaster areas
- Farms and factories
- Armed forces camps
- Recreational camping sites
- Non-profit organisation sites
- Archaeological sites

Prepayment Call

Thuraya PCO-2110 allows you prepayment calls on an amount or time basis. The facility allows the owner to enter a predetermined amount that you would like to spend on the call, or the specific time of the call before initiating the call. As soon as the configured amount/ time ends, the line is automatically disconnected.

Adding Service Charges

The operator has the option of adding a service charge (additional revenue margin) to the band rate charged by Thuraya. This feature is password protected to enable access to authorised personnel only.

Languages

Thuraya PCO-2110 supports Arabic, English, French, Persian, Russian and Urdu.
